Arbitration: the solution to tackle cross-border tax disputes

How to tackle the rising tide of cross-border tax disputes? „OECD Arbitration in Tax Treaty Law” shows the way to enhance the framework of cross-border tax dispute resolution.

This book constitutes a comprehensive compendium on international tax arbitration and provides in-depth analysis of all relevant aspects of the topic. The introductory chapters provide background information on tax arbitration and comparisons with other areas of law. The book also takes stock of the recent developments in this area within the OECD, the EU, the UN and the United States. It addresses the main concerns that have been raised with regard to arbitration, and compares and contrasts the design of various arbitration clauses. It also considers potential future developments.
